Logotype

Logotype

The sign has retained continuity to the original version. At the same time, the character of the wordmark has changed – it has become more confident, bold.

TAXDOME

TAXDOME

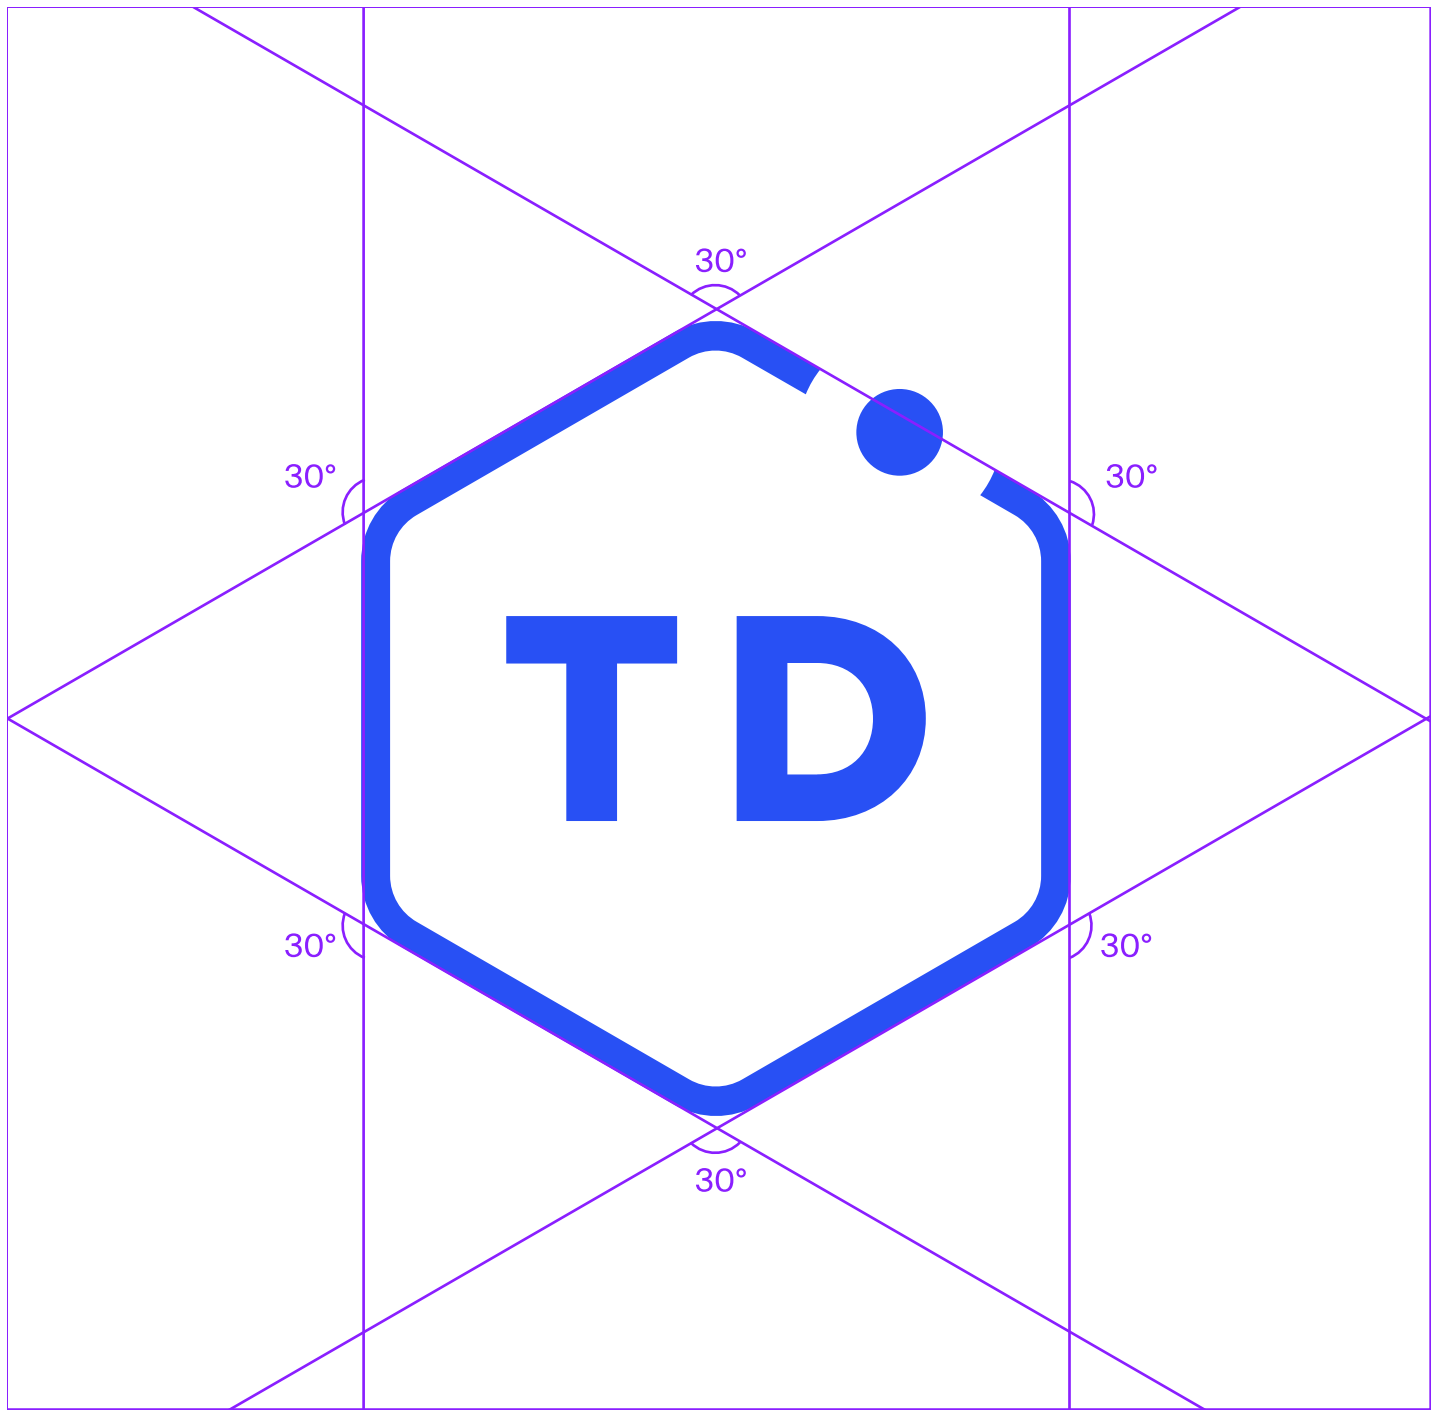

Sign

Hexagonal Outline: A geometric, hexagonal frame serves as the background, symbolizing structure and stability.

Blue Color Palette: A consistent, vibrant blue, commonly associated with professionalism, trust, and reliability.

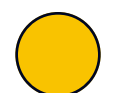

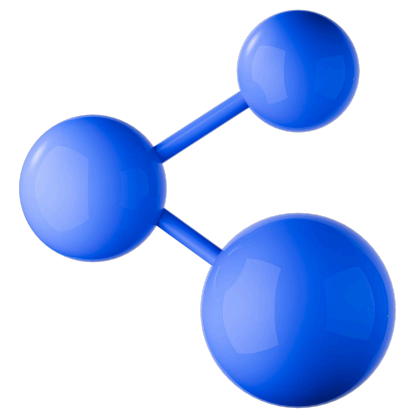

Typography: The letters "T" and "D" are presented in a clean, bold sans-serif font, emphasizing simplicity and modernity.

Minimalistic Dot Element: A small circular dot is positioned near the top-right corner of the hexagon, adding an element of uniqueness and balance.

Aa Bb Cc Dd Ee Ff Gg
Hh Ii Jj Kk Ll Mm Nn
Oo Pp Qq Rr Ss Tt Uu
Vv Ww Xx Yy Zz

Yellow on white can be used only for huge type (infographics, etc.) When the type is more than x10 than a body text.

Recommended color pairs

Try to avoid low-contrast colour pairs

Title font tracking

The font works great in medium headings. But sometimes it may be necessary to use it on a large scale. In such cases, it is necessary to slightly decrease the tracking.

Principles

Suisse Int'l

Decreased letter spacing (-2% in Figma) for large scale

Suisse Int'l

Normal tracking for small and medium scale (0% in Figma)

Examples

Secure cloud-based infrastructure with real-time updates.

Decreased letter spacing (-2% in Figma) for large scale

Empowering accountants and tax professionals to grow their businesses, build stronger relationships, and achieve a better quality of life through innovative, seamless, and scalable solutions.

Normal tracking (0% in Figma)

Automation of routine tasks like scheduling, billing, and document signing.

Normal tracking (0% in Figma)

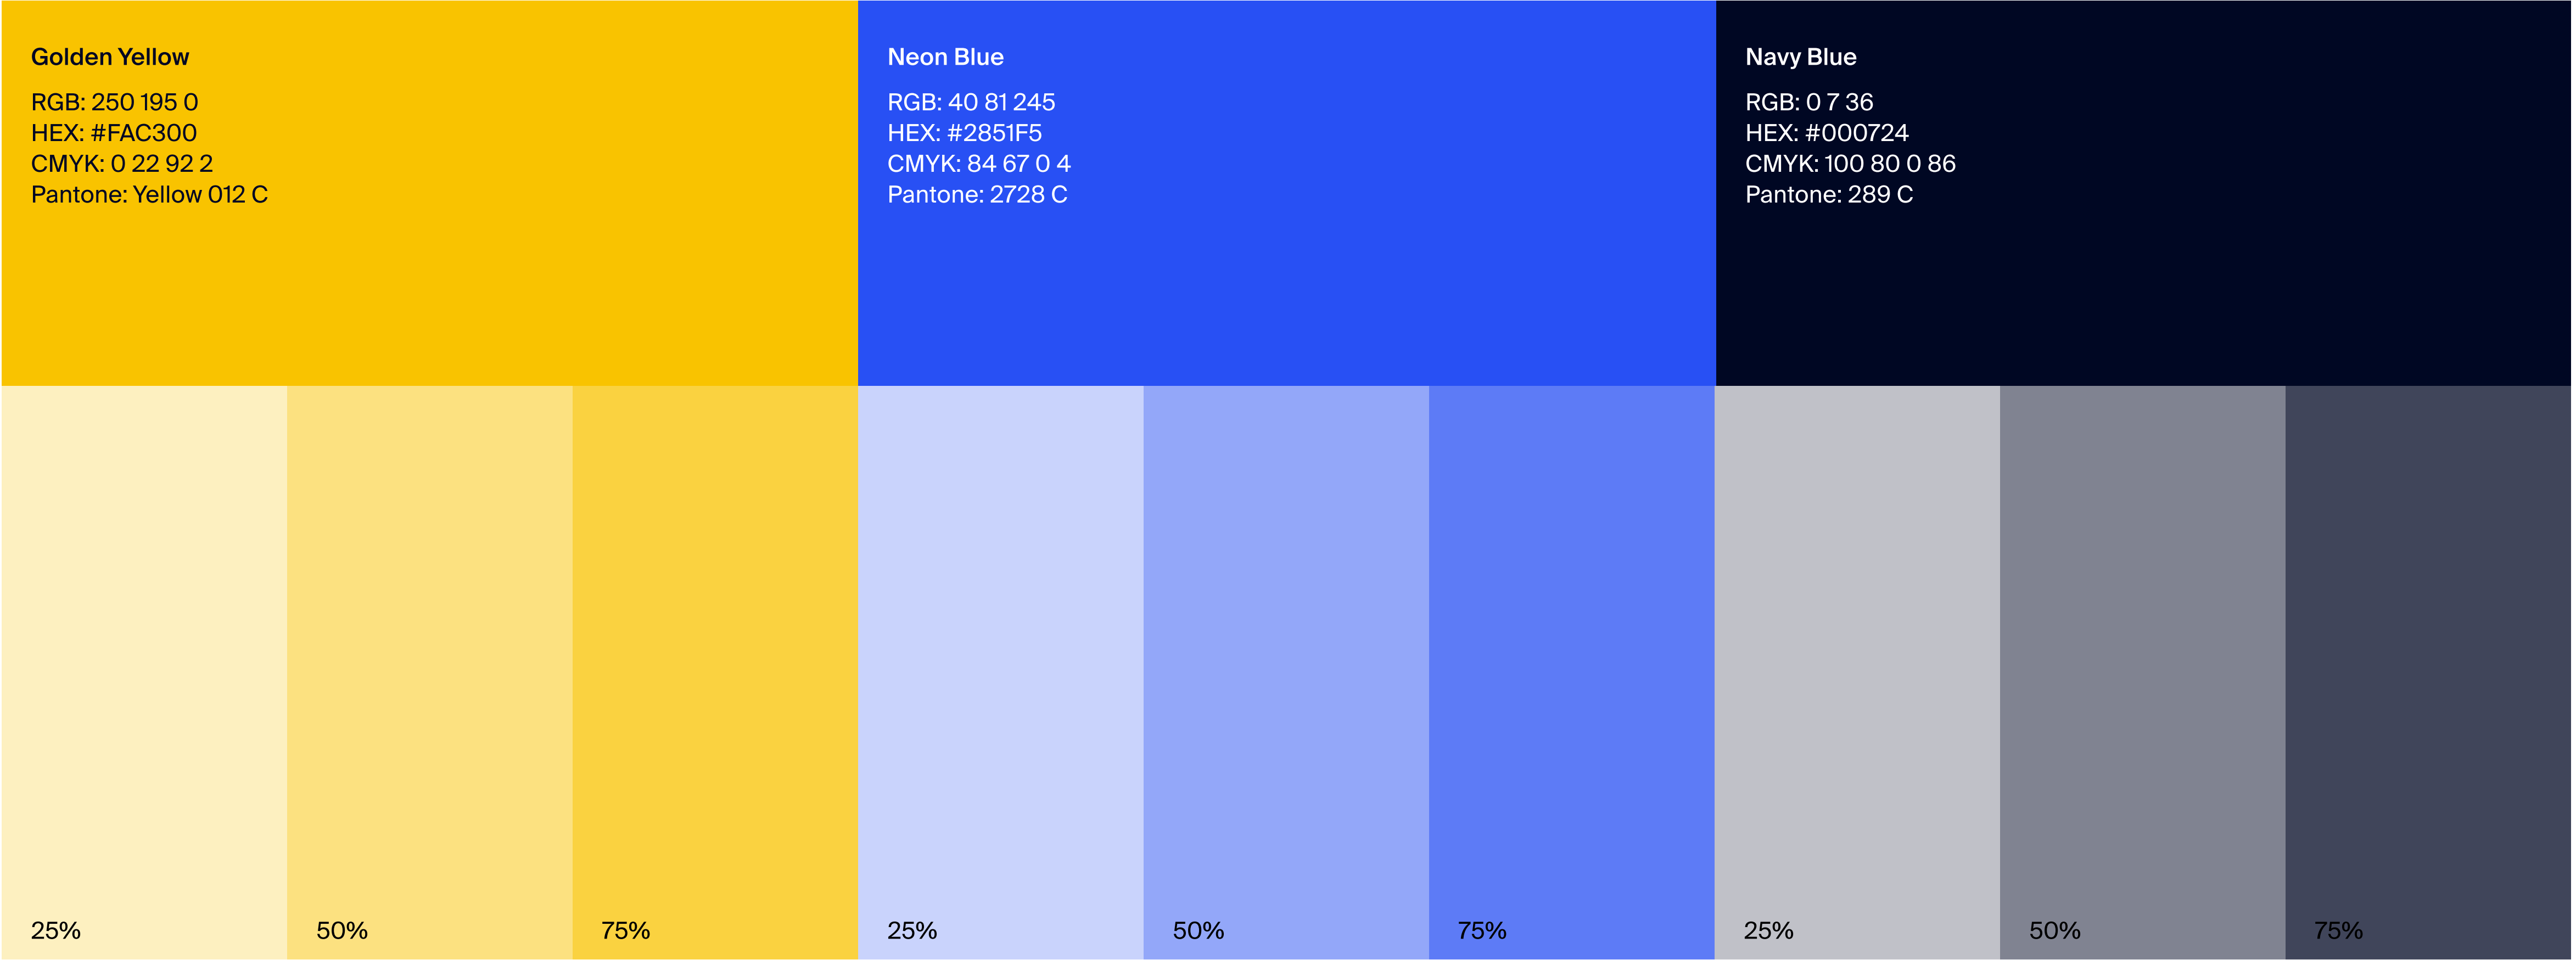

TaxDome is an all-in-one platform that simplifies accounting workflows, automates tasks, and helps firms scale effortlessly.

Colors

Colors

Halftones can be used in infographics, interfaces and other materials.

Status + Tech

Backgrounds

Hexagon

Hexagon usage rules

- The hexagon is never parallel to the ground (i.e., never perfectly horizontal).
- We use the hexagon to maintain a sense of motion and dynamism. For compositional stability, we use other elements.
- The hexagon is typically rotated by $\sim 15^\circ$ (you can use Shift to keep the rotation consistent).

Corner radius

- The hexagon corner radius is approximately: $(W \text{ or } H) \div 14$ (for a square, $W = H$).
- Example: for Dimensions 1400×1400, the hexagon corner radius is 100.
